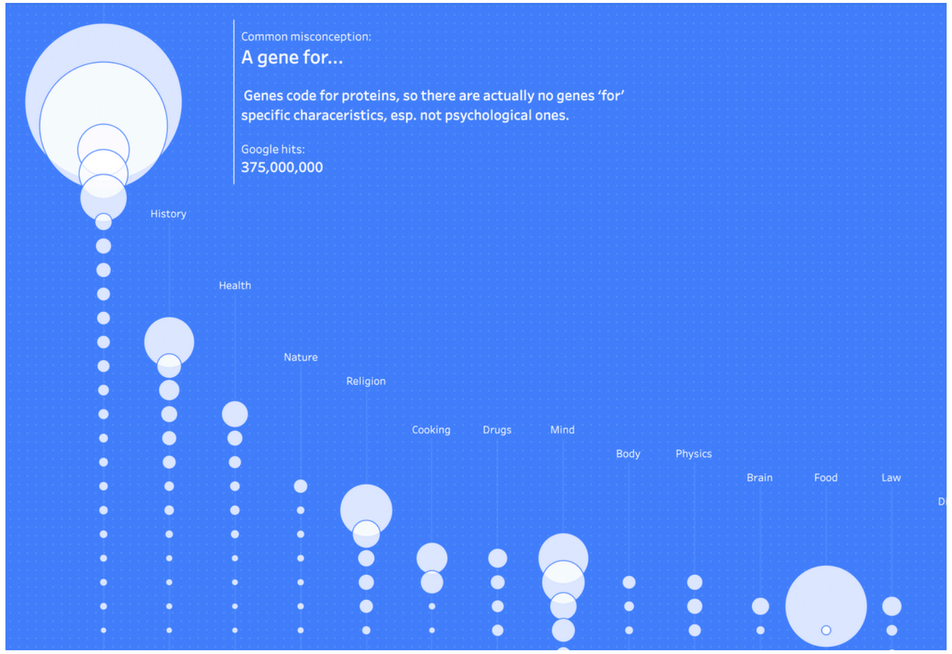
Information is spread across a wide layout, requiring scrolling and making comparisons difficult.

Too many data points displayed at once, which makes it difficult for a teacher to identify popular misconceptions.

Explanation details only appear on hover, which requires time-consuming exploration.

Misconceptions are not ranked by overall popularity, making it confusing to identify key misconceptions, and harder to prioritise what to teach.

Original Dashboard:



Original Dashboard (on left):

- Highly interactive and visually dense.
- Requires exploration to access information.

Redesigned Visual (on right):

- Simplified and focused on key insights for golden thread.
- Information presented directly for quick understanding.

A gene for...	Genes code for proteins, so there are actually no genes 'for' specific characeristics, esp. not psychological ones.	Science
Scientific Proof	Proof is incompatible with science which is, by its nature, provisional and self-correcting. Only Maths has proofs.	Science
The 5 Second Rule	Amount of bacteria transferredto fallen food depends on howcontaminated the floor is, nothow long the food stays there.	food
Satan rules Hell	Doesn't say this anywhere in the Bible.	religion
Human brains are special because they're huge	There might be other reasons why human brains are unique, but focusing on size ignores important possibilities.	Science
Get "Closure"	No evidence this mythical emotional end state is ever achieved by victims of trauma, bereavement or loss.	mind
Napoleon was short	A tall tale. At 5'7", he was actually above average height for a Frenchman of the time.	history
Antioxidants are good for us	Antioxidants don't do anything for our health, might actually be harmful. Research shows they have no effect on free-radicals in the body, don't prevent ageing.	Science
